

The nonstick reinforced with titanium to stand up to almost anything!

QuanTanium is the best of its kind: a multi-coat nonstick with titanium particles blended in for unusual durability:

- QuanTanium's multi-layer internal reinforcement of titanium creates outstanding resistance to scratching, abrasion and wear.
- The titanium used is many times harder than the chrome and steel used in cooking utensils.
- Titanium is used in demanding applications, from professional golf club shafts to critical components of the Space Shuttle.
- QuanTanium's nonstick system is designed to create maximum synergy with the titanium, resulting in maximum resistance to wear with unparalleled release.
