Whitford names Reinhold Industries Ltd. a “Whitford Recommended Coater”

January, 2014, Edmonton, Alberta, Canada. Whitford, makers of the world's largest, most complete line of fluoropolymer coatings, maintains a WRC, or Whitford Recommended Coater, program, which recognizes those applicators who meet or exceed guidelines set by Whitford. These criteria include knowledge of Whitford coatings and experience in applying them, having a strict quality-control program in place, and attendance at one of Whitford's customer training sessions. One of the newest members of the WRC is Reinhold Industries, Ltd.

Reinhold Industries is no stranger to supplying its customers with time-proven quality products and services. Boasting a 26,000 sq. ft. ISO-certified facility, Reinhold has over 40 years experience providing turnkey solutions that meet or exceed their customers' expectations. They are dedicated to working “hand in hand” with both Whitford and their customers, offering proven solutions to fight corrosion, abrasion, or a combination of both for all types of equipment.

Says Marcel Klutke, President of Reinhold Industries: “We thank Whitford for this recognition, and look forward to continuing our work with them.”
