## **Quality Product Finishing, Inc. named a "Whitford Recommended Coater"**

*October 2014, Houston, TX.* Quality Product Finishing, Inc. is one of the the largest coating applicators in the Houston area. With over 40 years in the coating industry, and an 80,000 square foot facility, they are able to house 2 powder coating lines, a conveyORIZED wet paint line, 4 batch ovens and state-of-the art indoor abrasive blasting facilities. They provide services to numerous market segments, as well as specialty coatings for industrial thin-film, corrosion resistant, sub-sea, conductive, anti-gall and decorative industries.

This is why Whitford, makers of the world's largest, most complete line of fluoropolymer coatings, has named Quality Product Finishing, Inc., as one of their Recommended Coaters. WRC (Whitford Recommended Coater) members have to meet certain criteria before they are eligible for the program, including knowledge of and experience in applying Whitford coatings, a solid quality assurance program and attendance at one of Whitford's bi-annual training sessions.

Says Richard Rossen, Quality Product Finishing's owner, "We look forward to continuing our partnership with Whitford as a Recommended Coater."
