

Introducing "Granite" nonstick coating, another advancement from Whitford

New "Granite" is a special three-coat spatter technology developed by Whitford that offers the handsome aesthetics of real granite — with improved hardness and nonstick properties.

These multi-colored spatters come in a single-coat form that enhances production efficiency as it reduces application cost.

Whitford offers five colorful versions of Granite: Ruby Red, Rosy Pink, Blue Pearl, Crystal Yellow and Arctic Grey. At the moment, Granite comes as part of the Eclipse® and Quantum®2 coating systems.

For more information, or for a sample, please contact your Whitford representative or Whitford directly: sales@whitfordww.com.

Where good ideas come to the surface

Five dazzling Granite colors to choose...

Ruby Red

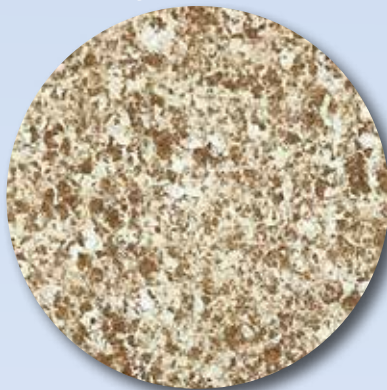

Rosy Pink

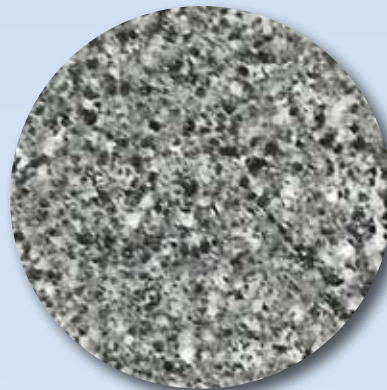

Blue Pearl

Crystal Yellow

Arctic Grey

How does new Granite compare with conventional coatings?

Laboratory test	Granite		Conventional water-based PTFE	
	Eclipse	Quantum2	3 coats reinforced	2 coats
Coating Thickness (µm)	40-60	30-50	40-60*	20-30*
Pencil Hardness	>6H	>6H	H	H
Adhesion	Pass	Pass	Pass	Pass
Saltwater Corrosion	Pass	Pass	Pass	Pass
Abrasion Resistance (LGA)	1.8 (good)	1.9 (good)	2.4 (good)	3.0 (satisfactory)
Abrasion Resistance (wet)	★★★★	★★★	★★★★↓	★★
Life-Cycle	★★★★★	★★★★↓	★★★★	★★

* Estimated thickness (excluding any spatter coatings that may be applied onto the topcoat).

New Granite has been developed in five colorful options: Ruby Red, Rosy Pink, Blue Pearl, Crystal Yellow and Arctic Grey. The choice is yours.

Given the unique technology that makes Granite possible, color matching is more complicated than with most coatings, including

standard spatter systems. At the moment, we only offer the five color combinations shown above.

For more information on Whitford's new Granite, please contact your Whitford representative or contact Whitford directly: sales@whitfordww.com.
